

NGUYỄN HỒNG THẨM

Software Engineer Intern (Fullstack)

Phone: 0362989907

Email: nguyenhongtham27.09.2004@gmail.com

Github: github.com/nguyen-hong-tham

SUMMARY

Final-year Information Technology student specializing in Fullstack Development, with hands-on experience building scalable web applications using React, Next.js, TypeScript, and backend technologies.

Experienced in developing RESTful APIs, designing relational databases, and integrating frontend with backend systems to deliver responsive and reliable user experiences.

Strong focus on performance optimization, efficient state management, and building maintainable, production-ready applications.

SKILL

Frontend: React, Next.js, TypeScript, Tailwind CSS, Redux Toolkit, React Query

Backend: Node.js (NestJS), RESTful APIs (experience with .NET Core, PHP – basic)

Database: PostgreSQL, MySQL, SQL Server

Core CS: Data Structures & Algorithms, System Design (basic), OOP, Problem Solving

Tools: Git, Docker, Jest, GitHub Actions, Swagger

PROJECTS

May Milk Tea E-commerce System

Feb 2025 – Apr 2026

Tech: React, TypeScript, Tailwind CSS, React Query, NestJS, Prisma, PostgreSQL, Socket.io, Firebase, VNPAY

GitHub : [May Milk Tea E-commerce System](#)

Developed a fullstack milk tea e-commerce system using React, TypeScript, and Tailwind CSS for frontend and NestJS, Prisma, and PostgreSQL for backend; designed and implemented RESTful APIs, authentication (Firebase OTP, JWT), and database schema; managed client and server state with Redux Toolkit and React Query; integrated VNPAY payment gateway and implemented real-time order tracking using Socket.io to support scalable order processing and system management.

Sep 2025 – Dec 2025

FoodFast – Drone Food Delivery Platform

Tech: React Native (Expo), React, TypeScript, Zustand, Tailwind CSS / Nativewind, Appwrite

GitHub : [Project Drone Food Delivery Platform](#)

Built a real-time food delivery platform with drone tracking simulation and map-based visualization.

Implemented efficient client-side state management using Zustand to handle high-frequency data updates and reduce unnecessary re-renders.

Optimized data flow and API integration to improve responsiveness under real-time conditions.

Developed scalable admin modules for managing orders, users, and restaurants, ensuring maintainability and extensibility.

Jewelry-Ecommerce Web Application

Sep 2025 – Dec 2025

Tech: Next.js, Strapi, TypeScript, PostgreSQL, Docker, Jest, GitHub Actions

GitHub : [Testing Jewelry Ecommerce Web](#)

Deploy: <https://jewelry-ecommerce-cyan.vercel.app/>

Collaborated in backend testing workflows and ensured frontend-backend consistency through validated business logic. Validated critical business logic including pricing, inventory consistency, and order workflows.

Configured CI/CD pipeline using GitHub Actions and Docker to automate testing and improve development workflow stability.

EDUCATION

Sai Gon University

Faculty: Information Technology

Current GPA : 3.03

2022-2027

CERTIFICATIONS

TOEIC (in progress)

VSTEP (B1)
